- Version Control with Git.

EXPERIENCE

ProWiggle Data Solutions| Full Stack Developer Intern | LINK ⏎

October 2022 - April 2023

As a full-stack Developer with 6 months of experience, I'm skilled in creating and maintaining web applications using various technologies. I work with **HTML**, **CSS**, **Bootstrap**, **Tailwind CSS**, **React.js**, and **JavaScript** for the **front-end**, and **Node.js** for the **back-end**. I'm particularly adept at **MERN Stack Development,** which involves using **MongoDB**, **Express.js**, **React.js**, and **Node.js** to build scalable and dynamic web solutions.

PROJECTS

E-commerce Application | LINK ⏎ | ⌂

March 2024

- Driving the entire development life cycle of a **MERN stack e-commerce** platform, actively involved in coding and implementation.
- **React.js** was used to create **responsive UIs** for product listings, detailed pages, Shopping cart, Checkout.
- Create a safe backend using **Express.js** and **Node.js** for Order processing, product management, and user **authentications**.
- Utilize **MongoDB** to storing order data , user details, product information.
- Consider using **JWT** for Secure **user authentication.**

TO-DO List | LINK ⏎ | ⌂

May 2024

- Build a user-friendly To-Do List app with HTML, CSS, JavaScript, handling tasks like **task creation**, **deletion**, and **status updates**.
- Allowing users to **add**, **edit**, and **mark tasks** as complete.

Weather App | LINK ⏎ | ⌂

August 2023

- Employed **modern web tools** to develop a **responsive interface** for real-time weather data.
- Used **APIs** to provide **accurate weather updates** for various locations.

ACHIEVEMENTS

- **Career Essentials in System Administration** by Microsoft and LinkedIn. ⏎
- **TCS iON** Career Edge - **Young Professional**. ⏎
- **Startup India** Learning program**.** ⏎
- **Internship selection Certificate** – Web Development at Garg Fondation Internshala**.** ⏎
